benefit the  
Autism One  
Childrens  
Charity**

**RM Auctions  
is donating it's  
commissions  
to Autism One  
for this item.**

The VirtualGT-Pro is a completely unique automotive experience... a programmable race car that allows you to simulate virtually any race car on any track, right in the comfort and safety of your game room or garage.

The racing experience looks real, sounds real, feels real. It delivers wickedly accurate sound, physics and graphics because the engine and drivetrain audio are recorded inside real race cars racing on real tracks. The VGT-Pro suspension, acceleration and braking physics are based on real-time race car telemetry. It's race tracks are created from GPS and satellite photography data.

Exceptional accuracy and attention to detail have made VirtualGT-Pro the first choice of racing professionals for serious off track practice. Strap in and your hands, feet and body will get feedback energy so intense that an idling Saleen S7-R will blur your vision, a snarling Ferrari 550 will rattle your teeth.

Feel the pulse of the engine on your face, the winding gearbox in your hands. The road hammers on your body. It's a perfect illusion created with obsessively engineered surround sound and tactile feedback systems pounding out of thirteen strategically located transducers that will immerse you, lap after lap, in a powerful, extremely realistic racing experience.

This VGT, generously autographed by racing legends Mario Andretti and Dan Gurney, will help fulfill your need for speed while helping the fight for a cure for Children's Autism. Test drives available before auction.

See website for details and arrange a VGT test drive at the auction at [www.virtual-gt.com/rm](http://www.virtual-gt.com/rm).

Autographed by Mario Andretti and Dan Gurney to benefit the Autism One Children's Charity.
