**The Virtual-GT RaceRoom,
the ultimate motorsports enthusiasts' domain.**

August 1, 2004 Costa Mesa, CA

Virtual-E Corporation, designers and manufacturers of the world's finest personal racing simulator the Virtual-GT, announced today the introduction of the Virtual-GT RaceRoom, a unique Gentleman's domain where motor sports enthusiasts can engage their friends in World Class racing simulations in the comfort and safety of their home.

Virtual-E Corporation, in conjunction with select Interior Design Firms in Miami, Houston, Atlanta, New York, Chicago, Seattle, San Francisco and Los Angeles are offering the RaceRoom as the ultimate domain for successful men to entertain while learning the nuances of high performance race driving. Conceived by Studio-X, an internationally renown, award winning automotive design firm,

the interior spaces employ large scale fine art murals that convey the excitement of automotive competition. The interior elements are a blend of architectural and automotive design and materials and incorporate the latest lighting, audio and video technologies.

Successful individuals are thinking seriously about the kinds of spaces they will call home. They want environments that will enhance their active and changing lifestyles. Designers are being challenged to create spaces that not only are functional and aesthetically pleasing, but also provide unique entertainment opportunities for friends and family.

Introduced in December the Virtual-GT Racing Simulator has become the one of the most sought after additions to the collections of successful motor sports enthusiasts. Each VGT has been obsessively engineered to provide an experience so realistic you feel as if you are in fact behind the wheel of a world-class racecar.
